Since humanity has known itself, there has been no description or interpretation of this mysterious and strange creature!. Just as each heart renews the feeling of love in its own way, the descriptions of women are renewed each time. But there is one divine truth that never changes. The Almighty bestowed upon her the high status of Mother. It is not for nothing that Motherland, Mother Nature, Mother Language, Mother Earth are called sacred and reverential.

Woman is the mirror of existence. Her beauty illuminates the world. Because his intention is pure, he is pure. That's probably why they say that the country that cares for a woman has a bright future. It would not be a mistake to make this comparison with our homeland and its beautiful, intelligent Uzbek women. We are once again convinced that a woman already embodies in her image such noble human qualities as beauty and refinement, kindness and selflessness. When we talk about women, we first and foremost think of our sacred and revered mothers, dear grandmothers, and dear sisters. No matter how much care and affection we give them, it is not enough. These women are the ones who cause babies to be heard every year in the world. In our sacred religion of Islam, there are many commandments about doing good to mothers and women, and many repetitions about not grieving mothers. For example, "Allah Almighty says in the 23rd verse of Surah Isra." Your Lord has commanded you to worship Him alone and to be kind to your parents. And if one of them or both of them reach old age in your presence, say not to them, "Of!" and do not hurt them, but speak to them kindly. ." Our Prophet (peace be upon him) advises his Ummah that one of the main issues that should be paid attention to is the fear of Allah regarding the rights of women and the protection of them as a blessing of Allah.

The attention and care paid to women in our country is also worthy of praise. Women living in our country have all the conditions they want. It should be noted that in recent years, more than 80 national and international documents have been adopted in our country, aimed at strengthening the role and influence of women in the life of society, protecting their legal, social, economic and spiritual interests. Even this work was elevated to the state level and 1899 was declared the "Year of Women," and 2001 was declared the "Year of Mother and Child." Today, our women have the opportunity to freely work in all spheres. Our women have the right to work in all spheres, be it education, industry, political-social sphere, entrepreneurship and farming.

Increasing the role and status of women in socio-political and socio-economic life is a very important priority of state policy in Uzbekistan. To this end, effective measures are being taken to strengthen the social activity of women, ensure their employment, further strengthen the institution of the family, and protect motherhood and childhood. Currently, 17 percent of the members of the Senate and 16 percent of the deputies of the Legislative Chamber of the Oliy Majlis of the Republic of Uzbekistan are women, and hundreds of women actively work in

regional, city, and district Kengashes of People's Deputies. Women make up 35% of entrepreneurs and 10% of farmers working in Uzbekistan. The experience and achievements of our country in the field of comprehensive protection of women's rights and interests, ensuring their active participation in the life of the state and society are of great interest worldwide.

In particular, this topic is being considered and discussed at the highest levels within the framework of multilateral institutions such as the United Nations Organization for Security and Cooperation in Europe, the Commonwealth of Independent States, and other organizations. For example, recently, at the UN headquarters in New York, information material on the topic "Social protection of women - one of the priorities of trade unions of Uzbekistan" was distributed among the 193 member countries of the organization.

For the first time in the history of Uzbekistan, the number of women in the national parliament has reached the level set by the UN. The parliament of our country has risen to 37th place among 190 national parliaments in the world in terms of the number of female deputies. However, if we pay attention to this - 5 years ago, we were in 128th place in this regard. Currently, more than 1,380 women are working in the system of state and public organizations in leadership positions. We are all delighted that 16 of our esteemed women have been awarded the highest award of our Motherland - the title of "Hero of Uzbekistan." The fact that among our women there are doctors of science, professors and academicians, hundreds of women who have been awarded the titles of "People's Teacher," "People's Poet," "People's Artist" is our pride. - The President of the Republic of Uzbekistan Shavkat Mirziyoyev in his speech dedicated to International Women's Day.
